

Multi Element Label™

The Multi Element Label™ (MEL) incorporates the Sensormatic® AM EAS sensor with an RF or RFID sensor applied to a polyester liner. The label does not require cover stock. MEL offers the widest flexibility in the placement of multiple pressure sensitive labels for high speed source tagging applications. Sensors can be placed and spaced on the polyester or paper release liner according to the specific application. The elimination of cover stock and applying two sensors in a single production run, saves time and money.

PRODUCT SPECIFICATIONS

Dimensions

Label Repeat Variable
Standard Width 2.5" (63.5mm)

Material

Anti-Static Silicone Release Liner

Adhesive

N/A

Printing

N/A

Packaging

Rolls of 5,000 15,000/Case
Core Diameter 6" with 3" insert

To Order **MEL** send request to info@csi-labels.com or call toll free 1-866-994-0338

Features

- Dual Sensor
- Optimal High Speed Application
- Labelling at Source

EAS Sensors

- Sensormatic® Accusto-Magnetic (AM) Sensor
All-Tag or Checkpoint Radio Frequency (RF) Labels
Alternative RF labels available on request
Any RFID Sensor

Suggested Applications

- Source Packagers and Manufacturers
