

Anti-tamper Seal™

The Anti-tamper Seal™ (ATS) is used to seal boxes and blister packs to inhibit thieves from opening and removing merchandise. ATS is manufactured using a specially designed material with the unique property of being destructible in one direction and difficult to tear in the other. When removal of the seal is attempted it splits into strip fragments, frustrating thieves and preserving store profits.

Custom printing and security information, logos and other images are available.

PRODUCT SPECIFICATIONS
