

UPC Guard+™

UPC Guard+™ prevents the over-labeling of “counterfeit” barcodes on boxes, bottles, and other containers. The label also includes a AM tag to prevent shoplifting. The translucent and brightly colored label is placed on top of the manufacturer’s UPC code making it obvious if barcode tampering or substitution is attempted. The label is designed to damage the surface of the package if removed.

UPC Guard+™ is also treated with a special top coating so that counterfeit barcodes will not bond to product surfaces. The label protects against price manipulation without interfering with effective reading of barcodes at the point-of-sale and UPC Guard+™ is color coded for visual identification at checkout.

PRODUCT SPECIFICATIONS

Dimensions

- Rectangle - 2 ¾" x 1 ¾" (70 mm x 45 mm)
- Square - 3.5" x 3.5" (90 mm x 90 mm)
- Custom Sizes

Material

Specially developed composite film with unique physical properties

Adhesive

Ultra-aggressive adhesive for high security

Printing

Tinted with Custom Color

Packaging

- Rectangle-Square/1000 Labels per roll
- Custom - n/a

Features

- Dual feature label
- Easy to apply manually or by machine
- Special top coating to prevent fake labels from adhering
- Aggressive bottom adhesive to prevent removal without damaging the package
- Color coded to ensure any barcode manipulation is easily identified by cashiers
- Manufactured in North America

EAS Sensors

- Sensormatic® AM Sensor

Suggested Applications

- Boxes
- Blister Packs
- Hard Goods
